

Agenda

Datum: Friday, June 12, 11:15

Locatie: C4.250

Chair: Kantuta

Minute taker: Sohrab

1. Minutes last meeting

The last meeting was on June 10, 2026.

- Any remarks regarding the last minutes?
- Are there action points that can be removed?

Estimated time: 5 minutes

2. **Data analysis** We will show the graphs we have until now (only missing one). Discuss what our own doubts are about some measurements. We would also like some feedback on these graphs and how we could present them better.
3. **Measurements** What measurements do we miss, what can we do for the last two days in the lab? Maybe some experiments with a glycerol solution.
4. **Feedback** Feedback on how we are doing until now. This is regarding our teamwork, independence, lab ethics, etc.
5. **New action points** What are our new action points for the week? What deadlines do we have? When is it best to have our next meeting?
