

Minutes

Wednesday, June 10, 2026

1 General

Opening: The meeting started at 13:10.

Present: Tarana (chair), Kantuta, Sohrab, & Jonas (minute taker)

Absent: -

2 Old Business - Minutes of last meeting

2.1 Approval of minutes of last meeting

The minutes of last meeting were approved.

2.2 Old action points

- × **Sohrab** Who, what, when filled in.
- ✓ **Kantuta** Send availability form for next week.
- ✓ **Everyone** Find out what is wrong with measurements 04/06/26.
- ✓ **Everyone** Download manim.

3 New Business

1. Minutes last meeting

The agenda of the last meeting had the layout of minutes, all wrong! We were trying to fix it but now we will leave it there, learn from our mistakes and move on.

2. Reading rubric

We need to improve our ownership, i.e. we need to come up with our own ideas more. We could also ask for feedback more.

We need to be more clear about how we divide our tasks.

3. Our goals

We only discussed very briefly about our progress. But we had to do enough other things.

4. **Brainstorming about poster**

posternumber and QR-code for the video needs to be on the poster.

research question: What is the influence of changing the external parameters as well as the characteristic parameters of different fluids on the breakup lengths of their jets.

We haven't started working on the poster yet, but we are going to work on it while looking at the rubric under the criteria of two points. Next week we will start working on the poster.

Things to work on according to the rubric of the poster:

layout: appealing design, easy to follow, the layout supports the message, creative use of layout elements.

content: concise and convincing, all key components (context, methods, research question, results, discussion) are present, data is clearly shown (figures, tables, formulas), citations.

discussion: adds value, all questions clearly and thoroughly answered with details, engaging.

5. **Brainstorming about animation (and video)**

Kantuta wants videos and photos of us in the lab.

The animation will explain the physics behind jet breakup (surface tension etc.).

Things to work on according to the rubric of the animation:

complementary to the poster with extra information, targeted audience is our year peers, a bit of humor, appealing in design, manim.

6. **Github** Only discussed very shortly, Sohrab and Jonas will organize the Github.

7. **Measurements and data analysis** We won't use the red needle because its diameter is very similar to the white needle. We will analyse the data from today, i.e. the measurements we repeated from 05-06-2026. If they don't match we will continue the measurements tomorrow.

8. **Any other business?** The fries were very nice.

4 New action points

To be finished before 12-06-2026.

- **Sohrab and Jonas** organize our github repository.
- **Kantuta and Tarana** organize our onenote.
- **Kantuta** Make photos and videos of the team members in the lab.
- **Jonas** Analysis for the data from 08-06-2026
- **Sohrab** Analysis for the data from 05-06-2026 and/or 10-06-2026
- **Tarana** Analysis for the data from 09-06-2026
- **Kantuta** first sketch for the poster

5 Closure

- **Next meeting: Friday, June 12, 2026** Chair: Kantuta Minute taker: Sohrab With Rosa.
- **Closure** The meeting ended at 16:07.
